MEMORANDUM FOR: Colonel Leo P. Garry

SUBJECT : Showing of Typhoon Photographs at the 177th Meeting
of the American Meteorological Society

1. On 27 March 1959, Dr. Robert D. Fletcher, Director of Scientific Studies, Air Weather Service, USAF, will give a film slide presentation before the 177th meeting of the American Meteorological Society at Chicago, Illinois. The subject of his paper will be "Upper Atmosphere and Space Meteorology."

2. The film slides to be utilized in this presentation were made available to Dr. Fletcher by the Project CHALICE Cover Officer and were reproduced from actual photographs of Typhoons KIT, IDA, and WINDIE, taken by means of the U-2 aircraft.

3. Dr. Fletcher's brief lecture is actually intended to support the cover of Project CHALICE. He will endeavor to demonstrate to the scientific community how the current typhoon study program has produced the first evidence of storm conditions as they appear from above. Such evidence will be stated as contributing immeasurably to programs utilizing satellites which are destined to be the future means for locating and identifying storm conditions on a world-wide basis.

4. It is anticipated that the presentation will cause some excitement among science writers covering the AMS meeting. In all probability Dr. Fletcher will be requested to release photographic copies of his slides. It is our recommendation that he refer such requests to the Office of Information Services, USAF, Washington, D.C. as the official releasing authority. Dr. Fletcher has so agreed.

5. In view of the expected situation cited above, it is requested that you coordinate the recommended procedure with Major
